

TAG SERVICES

- **Audit Telecom, Electric, Water and Gas Invoices**
- **If there are no opportunities uncovered then there is no cost to the client because we have no upfront fees. TAG covers its own travel and audit expenses.**
- **Self funded business model. TAG services are contingent based. We share a percentage in the savings portion produced. TAG invoices for their portion after the new revenue has been received by the client.**

We do all the heavy lifting. TAG requires a copy of one months of the most recently paid invoices.

WHAT DO WE LOOK FOR?

- **Invoice pricing must match current contract.**
- **Ensure competitive market rates for governments.**
- **Review tariffs and surcharges. Governments receive many fiscal benefits which governments should take advantage of the benefits.**
- **Test all services to validate they are still being utilized.**

Look for any negligence on behalf of your providers and if located go after refunds for damages. In many cases, we can go back several years for damages on your behalf.

TAG is seeing an increase of schools requesting audits due to the reduction of the Federal E-rate funding program. TAG recently saved a school system in Kentucky with 12 schools over 33% in their monthly spend and produced various refunds.

As a value added service, if you are considering an upgrade in your Telecom technology, ask us to help you to look at options. We have 30 years of experience in Telecom Engineering and Design. This comes at no cost to our clients.

Telecom Audit Group (TAG)
28 years of experience helping
government clients manage their
voice and data spend and now we
offer electric, water and gas utility
invoice audits.

*"In government, there is always an
opportunity to identify and cut wasteful
spending. The problem is having the time
and resources to dedicate to this.
Thankfully, TAG was easy to work with,
and to provide thorough audit which saved
our county thousands of dollars.*

*Steve Kelley, Judge Executive, Pulaski
County, Kentucky*
